

# Gust CSA Harvest Chart

The harvest chart below is only an estimation of when certain produce will become ready to harvest. Weather, timing of plantings, varieties of the crops planted, and crop tolerance to hot weather, cold weather, and wet weather will play a large role in the actual harvest dates of the produce.

**\*\*Our goal is to continue plantings of all of the crops so that the crops are available throughout a majority of the CSA season. We also plant 3-4 varieties or more of many types of crops so that we can stagger ripening times and extend the season for each crop.**

Produce	June	July	August	September
Lettuce	X	X	X	X
Peas/Snap Peas	X	X early mon?		X?
Carrots	X late month	X	X	X
Radishes	X	X	X	X
Red Beets	X	X	X	
Summer Squash	X late month	X	X	X
Zucchini	X late month	X	X	X
Green Beans		X	X	X
Cucumbers	X late month	X	X	X
Sweet Corn		X	X	X
Tomatoes		X mid month	X	X
Peppers		X mid month	X	X
Eggplant		X	X	X
Broccoli	X late month	X	X	X
